

## How can I automatically respond to users to let them know our office is closed?

Dan Baker - 2023-09-07 - [Comments \(0\)](#) - [Admin](#)

If you want to send Users an auto-response when they submit a ticket, to let them know it was received and provide information such as a delay in response you can leverage the helpdesk automations to do so.

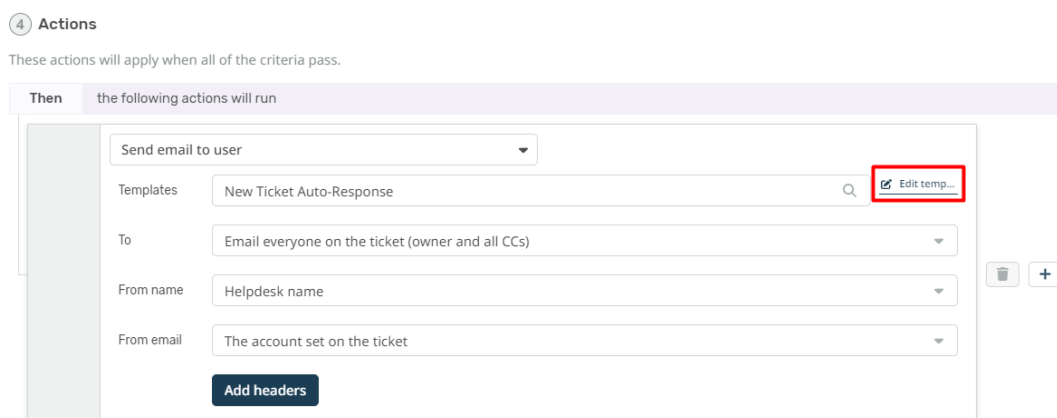

For this article, we will use the example of a temporary office closure. The team is relocating to a new building, so responses will be disrupted for the week the move takes place, but the helpdesk will be left active. To set up an automatic reply to new tickets that tell users you're away and there will be a delay in response, you want to set up a Trigger.

In **Admin > Business Rules > Triggers**, you can use a trigger to send an email explaining that there will be a delay in replying.

### Use Send auto-reply confirmation to User Trigger

For this instance, the premade **Send auto-reply confirmation to User** Trigger is ideal. You simply need to edit the Email Template associated with the Trigger to provide the information.

If you open this Trigger, under Actions you will see the option to *Edit Template*:

4 Actions

These actions will apply when all of the criteria pass.

Then the following actions will run

Send email to user

Templates: New Ticket Auto-Response [Edit temp...](#)

To: Email everyone on the ticket (owner and all CCs)

From name: Helpdesk name

From email: The account set on the ticket

[Add headers](#)

Select this to open the default Email Template. To edit the message, you want to select the phrase `user.emails.ticket_received`, which will open the custom phrase menu:

```
Template: admin.email_templates.em... Block: Name Phrase: helpcenter.emails.ticket_recei...

Email subject
1 helpcenter.emails.tickets_re

Email
1 <html>
2 <head>
3     blocks:resources.html.twig
4 </head>
5 <body>
6     emails_common:email_code_top.html.twig
7
8     blocks:header.html.twig
9
10    helpcenter.emails.greeting
11
12    <br/><br/>
13
14    helpcenter.emails.ticket_received
15
16    {% if app.isPortalEnabled() and can_login(recipient.id) %}
17    <br/><br/>
18
19    helpcenter.emails.ticket_access_ticket_online
20    <a href="{{ ticket_link }}">{{ ticket_link }}</a>
21    {% endif %}
22
23    blocks:footer.html.twig
24
25    emails_common:email_code_bottom.html.twig
26 </body>
27 </html>
```

Here, you can enter the message you wish to add. If you have other languages installed on your helpdesk, you will be able to add messages for each of these and the preview window to the right will show you the auto-reply message:

Template: admin.email\_templates.em... Block: Name Phrase: helpcenter.emails.ticket\_recei...

Edit Phrase: helpcenter.emails.ticket\_received

English  
Your ticket has been received. One of our agents will reply to you shortly.

Français  
Votre ticket a bien été reçu. Un de nos agents va vous répondre sous peu.

Español  
Recibimos tu boleto. Uno de nuestros agentes responderá pronto.

English (UK)

الإنجليزية  
تم إستلام تذكرك . سيقوم أحد مقدمي الخدمة بالرد عليك في أقرب وقت

Türkçe  
Çağrı kaydınız alındı. Personelimiz kısa sürede cevap verecektir.

Deutsch  
Wir haben Ihr Ticket erhalten. Einer unserer Mitarbeiter wird in Kürze antworten.

Once you're happy with the message, save the Phrase.
