JIRA "400: Bad Request oauth_problem=timestamp_refused" error

Ben Henley - 2017-11-08 - Comments (0) - Deskpro Apps

Question:

During the process of installing the Deskpro JIRA app, I get an error like this:

```
JIRA responded with error:400: Bad
Requestoauth_problem=timestamp_refused&oauth_acceptable_timestamps=14
49602521162-1449603121162
```

Answer:

This problem happens because the time on the server that runs Deskpro is wrong. Make sure the server time is set accurately.
