

Extension of Authentication Options (5.2)

2017-03-13 - Lauren Cumming - [Comments \(0\)](#) - [Product](#)

We have extended the authentication options available so that you can now:

- add agents/users to multiple usergroups
- add agents to teams
- add labels to agents
- add labels from value
- make an agent an admin

You can also now add multiple actions at a time and add filters e.g Add to agent permission group 'only if X'.

The screenshot shows the 'Login Actions' configuration page. On the left, there's a section titled 'Login Actions'. To the right, there's a table with columns for 'Add Action', a dropdown menu, and a checkbox labeled 'only if x'. The table contains five rows, each with the text 'Add to agent permission group' in the first column. A dropdown menu is open for the first row, showing a list of actions: 'Add to agent permission group' (checked), 'Add to agent team', 'Add to usergroup', 'Add label', 'Add label from value', and 'Make agent an admin'. At the bottom right, there's a green button labeled 'Call App'.
