On-Premise Controller Release 2.23.1

2025-02-13 - Lara Proud - [Comments \(0\)](#) - [DPC Releases](#)

This update enhances the reliability and customization of your On-Premise environment by addressing key issues and refining system configurations.

Latest Improvements

- Removed certain pre-installed packages from digital marketplace images

Bug Fixes

- Ensured custom Deskpro configurations are loaded correctly.
- Fixed MySQL to correctly load timezone data when absent and ensure permissions are correct.

On-Premise Controller Version 2.23.2

Bug Fixes

- Fixed issues with binary compilation for ARM architecture.
