

Option to disable CSP headers (5.5)

2017-03-13 - Lauren Cumming - 0 Comments - in Product

Under **Admin > Server > Server Settings** there is now a checkbox to disable CSP headers. CSP is enabled by default.

The screenshot shows the Admin Dashboard on the left sidebar with the following menu items: Admin Dashboard, Setup, Agents, Tickets, CRM, User Interface, Chat, Apps, Tasks, Server (expanded), Server Settings (selected), ElasticSearch, Report File, and Server Requirements. The main content area displays the 'Server Settings' page, which includes sections for 'Cookie Settings' (with fields for 'Cookie Path' containing '/' and 'Cookie Domain') and 'Content Security Policy (CSP)' (with a checkbox for 'Disable CSP headers' that is currently unchecked).
