

Send & Track DocuSign Documents in Deskpro

2025-09-23 - Lara Proud - [Comments \(0\)](#) - [Product \(Admin\)](#)

You can now manage document signing workflows for your users directly from Deskpro with our **DocuSign App** integration.

With DocuSign you can:

- **Automatic User Matching:** Deskpro users are matched to DocuSign recipients using their email address.
- **Manual Matching Option:** If no match is found, you can link a DocuSign user manually.
- **View Document Status:** See all envelopes (documents) linked to the user, including whether they've been completed.
- **Send New Documents:**
 - Choose a DocuSign template.
 - Select recipients (Deskpro autofills the current user's email, but you can add more).
 - Add a subject and message.
 - Send directly via email from Deskpro.

This makes it easier for agents to track and send signature requests without ever leaving the help desk.
