## **A separate agent permission to be able to control agent followers Collecting Feedback**

- C Christoph
- **Forum name:** #Feature Request

Additional permissions for agents to add and remove agent followers. At the moment, these permissions mimic the agents ability to **change ticket assignments** and **add/remove CC's**. In some cases more granularity is needed here.

Agreed. Adding a follower is exactly the same as adding a CC, so it makes literally no sense that it requires the permission to reassign tickets in order to work.
