## Content "helpful" rating options Collecting Feedback

- michael Offenbecher
- **Forum name:** #Feature Request

On all the news, and knowledge base articles there is the feature "mark this page helpful" it would be great if this could have a couple options. Those options would be... toggle it on or off, and/or make the option available to all users and not tie it to an ip address. We are a manufacturing facility where many employees may log into the same computer. This would allow everyone to be able to express there opinion and not just the first person that logs in. Thanks
