Enhancements to loading performance Archived

- FC Frederico Caldeira Knabben
- Forum name: #Feature Request

I'm researching on the loading performance of the DeskPRO Tech man page with the Firebug net panel. We have 23 requests with 1.1 MB being downloads.

>br/>>br/> For something that is supposed to be used by techs to enhance their productivity, it's doing quite bad. It takes several seconds to load each page, which is depressing.
>br/>
>br/>>DeskPRO looks like old stuff because of this, and this is also bad. After all, web loading performance is not news anymore nowadays.
br/>>br/>>br/>>l've also noticed that JQuery, MooTools and ExtJS (the monster) are all being used at that same page. You should stick with a single library.
br/>>br/>>br/>>br/>>br/>>Things to be achieved:
br/>>br/>>Reduce the number of requests to the very minimum.
br/>>br/>>cbr/>>cbr/>>br/>>the download size to the minimum.
