How can I show text on the Help Center only to a certain usergroup?

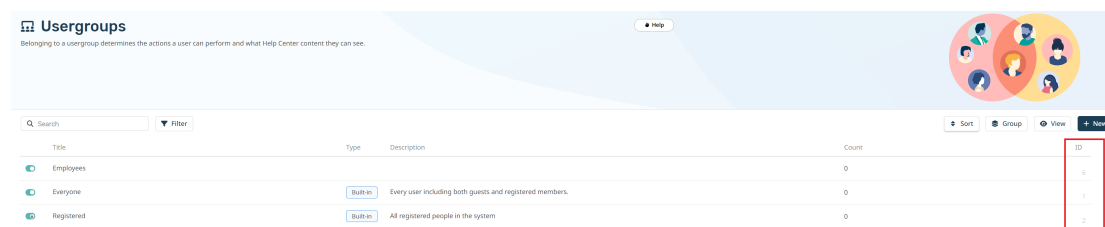

Hannah Scott - 2023-09-13 - [Comments \(0\)](#) - [Help Center](#)

Question:

How do I edit a portal template to show some text only to users who belong to a particular Usergroup?

Answer:

First, find the ID number of the Usergroup you wish to show the text to in **Admin > CRM > Usergroups**

Usergroups			
Belonging to a usergroup determines the actions a user can perform and what Help Center content they can see.			
• Help			
• Search • Filter			
• Sort • Group • View • New			
Title	Type	Description	Count
Employees			0
Everyone	Built-in	Every user including both guests and registered members.	0
Registered	Built-in	All registered people in the system	0

ID
0
1
2

Now add this to the Help Center template where you want the message to appear:

```
{% if app.user.isMemberOfUsergroup(N) %}
```

Text to display

```
{% endif %}
```

replacing N with the ID of the usergroup, and putting the message you want in place of "Text to display".

See the admin guide for [Editing Help Center Templates](#).
