

How do I customize the text that appears on my Help Center?

Can I change the text used on the Help Center outside of the Publish app content?

Yes, you can change almost all of the user-facing text on the Help Center and in emails using the Deskpro phrases system.

To do this, go to **Admin > Configuration > Phrase Translation**. To the phrase you want to change, you can use the **Search box** on the page or **Ctrl-F / Cmd-F** keyboard shortcuts to search for the phrase on each page.

Phrase Translation

The text you see in Deskpro is stored as phrases, that includes the names of custom object you create. Here you can manage the phrases and provide translation for custom phrases.
