How do I generate a report that doesn't include tickets created on the weekend?

Benedict Sycamore - 2023-08-29 - Comments (0) - Deskpro Legacy

For organizations that only provide support during Monday to Friday, it makes sense to exclude data from the weekend in reports to accurately develop a picture of helpdesk performance.

If you'd like to create a report that excludes tickets that were created at the weekend, add the following to the WHERE line in your DPQL query

WEEKDAY(tickets.date_created) NOT IN ('5', '6')

As you can see, this sets conditions on which days of the are included in the report by excluding 5 = (Saturday), and 6 = (Sunday).

Note

0 = Monday, 1 = Tuesday, 2 = Wednesday, 3 = Thursday, 4 = Friday, 5 = Saturday, 6 = Sunday.

For example, here is a an example of a report which will give you a list of tickets created in October, grouped by agent, whilst excluding tickets created on the weekend.
