

## How do I set up a new user registration form?

Manu Marquez - 2023-09-08 - [Comments \(0\)](#) - [Ticket Structure](#)

Some organizations need new users to complete a form to provide information, agree to network policies, etc.

This article explains how you can implement this in Deskpro so that users can submit a ticket form and all the information is added directly to their profiles. We'll also demonstrate how to embed a form to collect information from new users.

1. Go to **Admin > CRM > Fields > User Fields**. Click "New" to create a new Custom Field.

Name	Field Type	ID
Select	Select Field	1
Multiselect	Select Field	5
Date	Date	9
DateTime	Date & Time	10
Textarea	Multi-line Text	11
Toggle people field	Toggle	12
Currency people field	Currency	13

Choose a field from the list provided, and click **Configure Field**. For this example, we are going to use a toggle to record that the user agreed to your network policy.

Date & Time

Multi-line Text

Toggle

Currency

Add: New Field

☐ Single-line Text

A single-line input box that the user can type into.

☐ Number

Allows users to enter a numeric value.

☐ Multi-line Text

A multi-line input box that the user can type into.

☐ Select Field

Present predefined options to user as a drop-down, radio button or checkbox menu.

☒ Toggle

This field displays as a single checkbox.

☐ Date

Date Field lets user select a date using the calendar widget.

☐ Date & Time

Date & Time field lets user select a date & time using the calendar widget.

☐ Display

This field does not take input, instead displays the HTML entered by you the administrator.

☐ Hidden

This is a hidden field in the new-ticket form with no visible UI for a user to interact with. The value can come from a cookie or a query string parameter, or you can use custom Javascript in your templates to set the field dynamically. The field is still editable in the agent interface via a text box.

☐ URL

Configure Field

During the field configuration, you will be able to set up Title, Description, and User Validation amongst other values.

2. Go to **Admin > Ticket Structure > Departments** and create a new department called New Users.
3. In the **Form** tab, select **Custom Form Editor**.
4. Click on the **+ Field** button to add your newly created Toggle field — type the name of your field to find it in the provided list:

Add: New Ticket Department

5. To make it easy for users to find the form, you can embed it on its own page on your website/intranet. Select the **Website Embed** tab, and add the code to your site.

Add: New Ticket Department

InformationPermissionsFormWebsite Embed

Website Embeds are code snippets you can copy directly into your website to quickly add a Deskpro contact form to any page.

6. You could set up a trigger so that, if users haven't agreed to the network policy when submitting a ticket to any other department than "New Users", they get an automatic email reminder to fill in the new user form. You'll need to create a new email template for this reminder.
