DeskPRO Build #89 Released

2012-08-08 - Chris Padfield - [Comments (0)](#) - [Deskpro Releases](#)

We are pleased to announce a new release of the DeskPRO helpdesk platform, build #89.

The following is an automatically generated list of changes in this release:

- Fix loading error when updating phrase with a dot in the name
- Continued work on the DPQL system. More language constructs supported, including @'Alias' for alias references in the SELECT portion. Some advanced function behaviors supported too. Basic result rendering support.
- Fix poor regex pattern for match-all
- Fix invalid regex in IE8 that causes script erorr on page
- Generate license is always an ajax response
- Fix total downloads count being calculated wrong
- Update robots.txt to exclude billing, reports

If you are using the cloud version of DeskPRO, your account will have already been updated or will be updated within the next 24-48 hours.

If you are using DeskPRO download, you can update your installation from the admin interface.
