#361: Unable to create new Downloads Declined

- Joe Davis
- **Forum name:** #Bug Report

In the latest version of DeskPRO, I'm unable to create new Downloads from the Agent interface. Using the 'd' keyboard short cut or clicking the "+ ADD" tab causes a form to be created for "New News Post" instead of "New Download"

 This is a blocking issue for us, as we regularly create new downloads for our users

Can't replicate this in the current version.
