Browser notifications : keep some notifications unread Declined

- Geraldine Menard
- **Forum name:** #Feature Request

Hello!

 It would be nice to be able to choose in the list of the browser notifications which one should remain unread to be able to work on it later.

 Thanks!

Although we have not added this feature, we have now made it possible to view recently dismissed notifications. Notifications are not dismissed unless you manually do it so; so you can keep a notification unread indefinitely.
