scheduled task issue since last update Finished

- Mike Offenbecher
- **Forum name:** #Bug Report

"The scheduled tasks are either not running or the time between executions is too high" This is displayed at the top of the admin interface. Just for fun I deleted and recreated the scheduled task and it did not remove it. I also switched it from 1 minute to 2 minutes and that also did not fix it.

Please Check:

Admin -> Server -> Error Logs -> Command-Line PHP Error log.

Are there any errors there?

Also, try running the cron.php command directly from the command line.

Thanks; we are looking into it.

Mike Offenbecher

8 years ago

Ok running it from a command line got rid of the warning.

Christopher Padfield
