Show Count badges/bubbles only when > 0 Collecting Feedback

- **Forum name:** #Feature Request

I noticed it when looking at the task list. It is just an endless row of blue badges regardless of the number of items. From an UX point of view the badges should only be shown when the item count is greater that 0.
This applies to all occurrences throughout Deskpro except maybe the SLAs. In those cases badges with 0 have a transparency effect to them already.
