

subpage /ticket-rate language error Finished

- Kenneth

Hey guys, I was testing some ticket feedback, and noticed that the language did not set accordingly. Example: Server supports Danish and English language. Test user primary language is set to Danish On the front page of the helpdesk, the language is Danish, correct. On the helpdesk.dk/ticket-rate/ subpage the language is not accounted for, and defaults back to english. I'm not sure if this happens anywhere else.
