Sync Deskpro contacts to Outlook In Development

- Casper
- **Forum name:** #Feature Request

We have a lot of customer information in Deskpro that we would like to be able to sync to Outlook.

Currently we have to do this manually but it would be great if you could export this information from Deskpro directly into Outlook (and perhaps use a user label to track who has been synced to the Outlook directory).

I see this one is in development. Is there a roadmap when it is comming?
