Warnings during update (via CLI-Updater) Finished

- CC Christopher Callaham
- **Forum name:** #Feature Request

Every few upgrades I get warnings in the command line upgrader <br /> <br /> Warning: rmdir(C:\inetpub\wwwroot\betadesk/app/sys/cache/twig-compiled\54): Directory not empty in C:\inetpub\wwwroot\betadesk\app\vendor\symfony\src\Symfony\Component\HttpKernel\Util\Filesystem.php on line 98<br /> <br /> Warning: rmdir(C:\inetpub\wwwroot\betadesk/app/sys/cache/twig-compiled\49): Directory not empty in C:\inetpub\wwwroot\betadesk\app\vendor\symfony\src\Symfony\Component\HttpKernel\Util\Filesystem.php on line 98<br /> <br /> Warning: rmdir(C:\inetpub\wwwroot\betadesk/app/sys/cache/twig-compiled): Directory not empty in C:\inetpub\wwwroot\betadesk\app\vendor\symfony\src\Symfony\Component\HttpKernel\Util\Filesystem.php on line 98<br /> <br /> I think the upgrade actually finishes but I don't know if it causes any issues when they happen.
