Getting started with Deskpro development

Ben Henley - 2019-10-02 - Comments (0) - Deskpro API

There are several ways you can work with DeskPRO as a developer:

The [DeskPRO REST web API](#) - comes with its own [PHP SDK](#).

[DeskPRO Widgets](#): an easy way to add simple widgets to the agent interface using just Javascript and HTML: useful if you want to pull data from another system and display it on tickets, for example

[DeskPRO Apps](#): you can develop Apps like the ones you can install from **Admin > Apps**. Enable more elaborate integrations or interface changes.
