

How do I display dates in the US format in reports?

Benedict Sycamore - 2019-01-02 - 0 Comments - in Using Deskpro

In some geographies and organizations, date formats can appear differently to others. If you'd like to alter the format of the date in the reports you create, simply use the following clause to produce desired results:

```
SELECT DATE_FORMAT(tickets.date_created, '%Y-%m-%d') AS 'Date created'
```

For example, the following query:

```
SELECT DATE_FORMAT(tickets.date_created, '%Y-%m-%d') AS 'Date created',  
ticket_messages.date_created
```

Will create the following result, where the month value is displayed prior to the day value:

 Download as CSV

Date created	Status
	archived
	archived
	archived
	archived
	awaiting_user
	awaiting_user
2018-10-04
