Deskpro 2021.1.7 Release

2021-07-06 - Christopher Nadeau - Comments (0) - Release Announcements

We are pleased to announce the release of **Deskpro version 2021.1.7**. This includes a mixture of general improvements and bug fixes.

General Improvements and Bug Fixes:

- DPLEG-30453 - You may now ignore exact participant matching on emails for using Deskpro's subject matching algorithm. This can be set from Admin > Email Accounts > Advanced Settings.
- DPLEG-28018 - Fixes department permission issues in API calls in some cases
- DPLEG-30380 - Fixes bug to do with setting hotlinked download URL in some cases
- PR-6014 - Fixes issues with rendering v2 API doc in some cases
- PR-5976 - Adds no_proxy setting to define hosts that should not be passed through HTTP proxy
- This update includes many security related improvements

Patch notice (build 52233) - 2021-07-07

- PR-6028: Fixed: Instances still using the legacy chat widget had the widget settings reverted to default settings
