DeskPRO Build #193 Released

2012-11-29 - Chris Padfield - Comments (0) - Release Announcements

We are pleased to announce a new release of the DeskPRO helpdesk platform, build #193.

The following is an automatically generated list of changes in this release:

- Dont attempt to write originalCharset property on ezC part objects, they are read-only
- Fix race condition when updating a setting.
- Ensure that waiting times are always initialized as expected.
- Fix potential error when viewing a ticket.
- Update widget code to use same url as deskproUrl var
- Fix pixel jump

If you are using the cloud version of DeskPRO, your account will have already been updated or will be updated within the next 24-48 hours.

If you are using DeskPRO download, you can update your installation from the admin interface.
