DeskPRO Build #200 Released

2012-12-05 - Chris Padfield - Comments (0) - Release Announcements

We are pleased to announce a new release of the DeskPRO helpdesk platform, build #200.

The following is an automatically generated list of changes in this release:

- Maintain the icon for desktop notifications, but don't use the asset helper to do it.
- When logging in from LDAP or Active Directory, try to pull a photo and use that for the user by default.
- Fix 'this month' date range in overview reports
- Handle case where db has no 'all' transport defined

If you are using the cloud version of DeskPRO, your account will have already been updated or will be updated within the next 24-48 hours.

If you are using DeskPRO download, you can update your installation from the admin interface.
