DeskPRO Build #302 Released

2013-09-20 - Chris Padfield - Comments (0) - Release Announcements

We are pleased to announce a new release of the DeskPRO helpdesk platform, build #302.

The following is an automatically generated list of changes in this release:

- FIX Fix crashes in Google Chrome ("sad tabs"). This was caused by a memory garbage collection bug in Chrome itself that required a workaround.
- FIX Tickets created via the API did not correctly fire triggers based on labels
- FIX Phone, mobile and fax icons in person and org contact info list
- FIX "Skype" IM account in organization contact info would be saved as ICQ
- FIX Editing organization contact info would re-set the select box option to "AIM" in IM accounts

If you are using the cloud version of DeskPRO, your account will have already been updated or will be updated within the next 24-48 hours.

If you are using DeskPRO download, you can update your installation from the admin interface.
