DeskPRO Build #99 Released

2012-08-16 - Chris Padfield - Comments (0) - Release Announcements

We are pleased to announce a new release of the DeskPRO helpdesk platform, build #99.

The following is an automatically generated list of changes in this release:

- Fix notice when rendering custom field value term, fix error when assigning team at time of ticket creation
- Gateway dir mapping should be lowercase
- Add check for writable error log file
- Fix web submitted messages not saving ip/visitor info

If you are using the cloud version of DeskPRO, your account will have already been updated or will be updated within the next 24-48 hours.

If you are using DeskPRO download, you can update your installation from the admin interface.
