

New Feature: Click-to-edit fields on tickets

2017-01-17 - Lauren Cumming - Comments (0) - Product

We are always looking for ways to improve your experience with Deskpro in terms of making it more user-friendly. This is why we have introduced 'Click-to-edit' fields on tickets. You can now simply click on any field in your ticket properties box, such as Workflow or Category, and edit it straight away. Click on a field, edit it and press save at the bottom to make a change. You don't have to click on the gear to make fields editable anymore which is a great time saver and makes this process a lot more effortless.

The screenshot displays the 'PROPERTIES' tab of a ticket in Deskpro. The interface includes tabs for 'LINKED TICKETS (3)', 'TASKS (0)', and 'SLAS'. The 'Agent' field is set to 'Unassign' with a dropdown menu showing 'John Doe'. The 'Team' field is set to 'None' with a dropdown menu. The 'Followers' field has a '+ Add Me' button and a '+ Add a follower' button. Below these are fields for 'Labels' (with an 'Add a label' button), 'Language' (set to 'English'), 'Which option applies?', 'What date is this for?', and 'Please add your recommendations:'. At the bottom, there is a toolbar with icons for 'Lock', 'Merge', 'Macros', 'Remove', and 'Actions'. Below the toolbar are tabs for 'REPLY' and 'NOTE', and a rich text editor with various formatting options like bold, italic, underline, link, unlink, bulleted list, numbered list, indent, outdent, table, image, code, and a close button.
