Billing Report for hours only instead of days Collecting Feedback

Can we have an option on the report to show hours only instead of days and hours? If a trainer is on-site for 40 hours. The report shows 3 days and 8 hours. Since we bill by the hour our bookkeeper has to convert that back to hours. That’s why I put 80 hrs in the comment. This part of the product really has the potential to help my team. Since I manage a billable team this report would keep them from having to track time on a separate time sheet. Thank you for your consideration of this enhancement request.
