If we create a custom field with field type Single-line Text Box or Multi-line Text Box.

Field Type	Single-line Text Box
Enabled	<input type="checkbox"/> Enable this field
Title *	<input type="text" value="Detail Topik"/>
Alias	<input type="text" value="detail-topik"/>

Field Type	Multi-line Text Box
Enabled	<input type="checkbox"/> Enable this field
Title *	<input type="text" value="Summary Permintaan"/>
Alias	<input type="text" value="summary-permintaan"/>
Description	<input type="text" value="Ringkasan permintaan dari user"/>

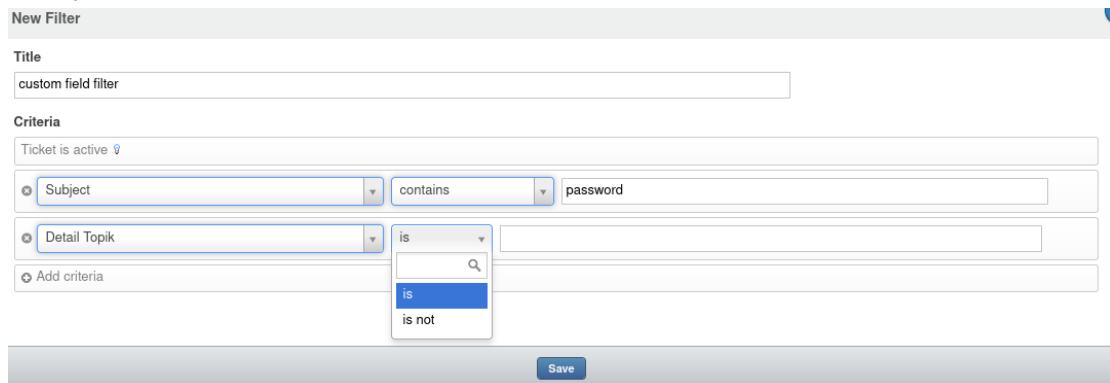

The content of this field is free text, just like the content of **Subject** field.

When we create a Filter, for **Subject** field there is four option: **contains**, **does not contain**, **is**, **is not**

The screenshot shows a 'New Filter' dialog box. The 'Title' field contains 'custom field filter'. Under 'Criteria', there is a dropdown menu for 'Subject' with a search icon. A dropdown menu is open, showing the following options: 'contains', 'does not contain' (highlighted in blue), 'is', and 'is not'. A 'Save' button is located at the bottom right of the dialog.

But, for a custom field with type is Single-line Text Box or Multi-line Text Box, we just have two options: **is** and **is not**.

The screenshot shows a 'New Filter' dialog box. The 'Title' field contains 'custom field filter'. Under 'Criteria', there are two criteria: 'Subject contains password' and 'Detail Topik'. A dropdown menu is open for the 'Detail Topik' field, showing the following options: 'is' (highlighted in blue) and 'is not'. A 'Save' button is located at the bottom right of the dialog.

Could we add the option: **contains** and **does not contain** when we make a filter using a custom field with type: single-line and multi-line text box.
