Reordering possibility of the opened ticket tabs. Collecting Feedback

- **Nombre del foro:** #Feature Request

It would be nice feature if the tabs of the opened tickets could be reordered by dragging with the mouse. If i have a lots of opened tickets, it is difficult to switch between those tickets which are located far from each other.

Possibility to change/reorder the tabs - now we can scroll right and left only. In case of a huge number of open tickets, it causes difficulty to find a ticket. Especially in case of a page refresh or a certain ticket action because in this cases the active tab loses the focus.
