First Contact Resolution

Matthew Wray - 2023-09-08 - [Comentarios \(0\)](#) - [Reports](#)

Creating a list of tickets that were resolved with only 1 agent reply can be created in the following DPQL format:

```
SELECT tickets.id, tickets.subject, tickets.agent, tickets.date_created
FROM tickets
WHERE tickets.count_agent_replies = 1 AND tickets.status = 'resolved'
ORDER BY tickets.date_created
```

The resulting table will be displayed as shown below:
