Question:

I'm trying to test email notifications. I make myself a test ticket and I don't get an email. Other automatic emails seem to be working. What's wrong?

Answer:

By default, you don't get notifications about your own actions on tickets, including creating them.

Notes with @mentions

How do you want to be notified when an agent mentions you in a ticket note?

Always email and send a message via Agent IM

Save

If you want to enable email notifications for your own actions, go to your **Preferences** at the top left of the agent interface, and change the **My Own Actions** settings under **Email Notifications**.
