New Feature: Quick Assign To Yourself And Your Team

2014-08-11 - Ben Henley - [Comentarios \(0\)](#) - [Product](#)

Assigning tickets to agents and teams is a core part of DeskPRO helpdesk workflow. We're always working to make the agent interface faster and easier to use, and we've found a way to make assignment that little bit quicker.

We realised that the agent you assign tickets to the most is probably *yourself*, so we added a one-click **Assign to Me** link.

A screenshot of the DeskPRO ticket assignment interface. At the top, there's a navigation bar with 'Support' and 'Awaiting Agent' (highlighted in yellow), along with a '1' in a yellow box and a flag icon. Below this is a tabbed interface with 'PROPERTIES' selected. The main area shows three assignment options: 'Agent (Assign to Me)' with a dropdown menu currently showing 'Unassigned' and a mouse cursor hovering over it; 'Team (Assign to My Team)' with a dropdown menu showing 'None'; and 'Followers (Add Me)' with a button that says 'Add a follower'. Below these are fields for 'Product: None' and 'Labels: Add a label'.

We've also added one-click links to **assign a ticket to your team** or **add yourself as a follower**.

It's one of the little touches that adds up to make our slick, modern interface a pleasure to use.
