Ability to view each ticket that used a particular snippet in "snippet reporting" Finished

- Jason
- **Forum name:** #Feature Request

Would it be possible to add links to the snippet reporting feature so we can easily see the tickets where the snippets were used?

```
The following report should allow you to do this :) DISPLAY TABLE SELECT
OBJ_LANG(ticket_object_use_logs.snippet.category.id, 'text_snippet_categories') AS 'Snippet
Category', OBJ_LANG(ticket_object_use_logs.snippet.id, 'text_snippets') AS 'Snippet', COUNT()
AS 'Uses' FROM ticket_object_use_logs WHERE ticket_object_use_logs.snippet.id <> NULL
AND ticket_object_use_logs.date_created = %1:DATE_GROUP% SPLIT BY
ticket_object_use_logs.snippet.id GROUP BY ticket_object_use_logs.ticket.id ORDER BY
COUNT() DESC
```
