Ability to view each ticket that used a particular snippet in "snippet reporting" Finished

- Jason
- Forum name: #Feature Request

Would it be possible to add links to the snippet reporting feature so we can easily see the tickets where the snippets were used?

The following report should allow you to do this:) DISPLAY TABLE SELECT

OBJ\_LANG(ticket\_object\_use\_logs.snippet.category.id, 'text\_snippet\_categories') AS 'Snippet
Category', OBJ\_LANG(ticket\_object\_use\_logs.snippet.id, 'text\_snippets') AS 'Snippet', COUNT()

AS 'Uses' FROM ticket\_object\_use\_logs WHERE ticket\_object\_use\_logs.snippet.id <> NULL

AND ticket\_object\_use\_logs.date\_created = %1:DATE\_GROUP% SPLIT BY
ticket\_object\_use\_logs.snippet.id GROUP BY ticket\_object\_use\_logs.ticket.id ORDER BY
COUNT() DESC
