

Where will my data be hosted?

Ben Henley - 2021-09-21 - Comments (2) - Security & Data

Question:

I'm interested in your Cloud service, but my tickets can contain sensitive information. Where geographically will you host my data?

Answer:

If there are regulatory reasons why your helpdesk must be hosted in a certain country or region, we can arrange to make sure all your data is kept on Cloud servers in the right place.

Please contact sales@deskpro.com to discuss your requirements.

Where is the data currently hosted? UK?

Ben Henley

5 years ago

By default, data is hosted in the US. We can offer hosting in the EU if required.
