

New Chat Widget colors available

2017-05-30 - Zara Marchesi - Comments (0) - Product

You can now set colors for the Chat Widget itself, allowing you to customize this feature even more!

How do I set the color?

Simply go into Admin > Chat > Site Widget & Chat, and customize your colors!

The screenshot displays the 'Site Widget & Chat' configuration page in the Deskpro Admin interface. The 'Button settings' section is active, showing options for the chat widget's appearance. A color picker is open for the 'Background color' of the 'Right' button, with the hex code #e60300 selected. The preview on the right shows the chat widget with a Google search bar and a chat window. Arrows indicate the location of the buttons being customized.
