

New Chat Widget colors available

2017-05-30 - Zara Marchesi - Comments (0) - Product

You can now set colors for the Chat Widget itself, allowing you to customize this feature even more!

How do I set the color?

Simply go into Admin > Chat > Site Widget & Chat, and customize your colors!

The screenshot displays the 'Site Widget & Chat' configuration interface. On the left, the 'Button settings' panel is expanded, showing options for 'Label' (set to 'Click for help'), 'Size' (set to 'Medium'), and 'Colors'. The 'Colors' section includes a 'Background color' picker with a color wheel and a text input field containing the hex code '#e60300'. Below the color picker are options for 'Column' and 'Left' alignment, and 'Right' and 'Left' orientation. The 'Chat settings' and 'Proactive chat settings' sections are also visible but collapsed. On the right, a preview window shows the chat widget on a website. The preview includes the Google logo, a search bar, and a chat window with a 'Flexforce' header. The chat window shows a 'Sample question' and a 'Sample answer'. A red 'Click for help' button is visible in the bottom right corner of the preview. At the bottom of the preview, there are 'Discard changes', 'Save', and 'Reset to default' buttons. A black arrow points from the '#e60300' color code in the settings panel to the 'Click for help' button in the chat widget preview.
