Attached files to a ticket can't opened in Apple Mail and IOS mail Collecting Feedback

File not found error message •

Forum name: #Bug Report •

After sending out a ticket with attached files to a user / customer, in several cases our clients complain whereas the attached files can't be opened, but they behave as a link, so clicking on the attached file, the portal site opens forcing login instead of simply downloading the file.

.Referring to our tests it occurs using apple mail and IOS mail
