At the moment you can only drag articles between folders - in some scenarios it would be very useful to Copy articles. For example if you have two different usergroups, they each have different articles but perhaps there are 2 or 3 individual articles which they should both see, but you want to change the wording ever so slightly in each copy.<br /><br /> <br /><br /> Rather than copying/pasting text into a new article, a "copy this article to - .> [Select Box of Categories]" would be perfect
