Dark/Night mode theming? Collecting Feedback

Kevin Fox •

Forum name: #Feature Request •

Any consideration to adding themes to the interface so people can change the default white
?an blue theme, preferably some sort of dark/night mode

(Comments (۱۴

This would be nice to see built-in...I created my own dark mode and it took 3,300 lines of CSS
to change everything including reports, admin, etc. <http://oi63.tinypic.com/2lk8hzl.jpg>

?Hey Josh, Is that difficult to implement

Felixx

5 سال پیش

Please please add the ability to switch to Dark theme. We have people working 24/7 and at
!!!night it would be so much easier on the eyes thank you

Rajith

Until Deskpro implement the actual dark theme, you can use extensions or force your web
browser to enable dark mode for all websites by using these switches: edge://flags/#enable-
(force-dark (Edge), chrome://flags/#enable-force-dark (Chrome

Please implement dark mode. This being a default bright white with bright baby blue is hard
.on our teams eyes long term

Edward McQuaig

Dark mode is almost a requirement for our teams now. With the new DeskPRO, there's even MORE whitespace to deal with! We've tried browser addons which work but slow down pages substantially. Please implement! -- B

Everything we use has dark mode. Deskpro is the only one that doesn't have implemented, .it's really hard to look at a light bulb all day

Beachy, April

!Our staff need the dark mode too

Gail Hovanec

5 ماه پیش

Let me add my voice here - not only is dark mode desperately needed, but the ability to increase font size would be nice as well. As others have said, the white space is just too much to deal with. When working long hours and spending most of it looking at the interface, it is .really tiring on the eyes

Official dark mode is pretty much needed nowadays for systems that people use all day. .Older Deskpro was not pure white but more greyish
