Microsoft Teams Integration Collecting Feedback

Harrison Hudson •

**Forum name:** #Feature Request •

As our organization becomes more and more reliant on Teams and the O365 ecosystem, it is only a matter of time before we look towards a help desk system that also integrates with the .ecosystem. I hope this is in the pipeline

Yup we're looking at Teams now too. I notice that Zendesk is ready to plug in to it. When can ?we have Deskpro integrated

We use Microsoft teams a lot in our department. It would be nice with a Teams app for DeksPRO, in order to do ticket triggers that would integrate into Teams channels, like with .the Slack app

Any update on this topic? Saw there is the ability to set triggers. Curious what else DP can do .with Teams, maybe in DeskPro now or DeskPro Horizon
