Number of tickets created by month Report

Matthew Wray •

Forum name: #DPQL Reports •

:The query below creates a count of tickets created by month and year

```
'SELECT DPQL_COUNT() AS 'Tickets Created
FROM tickets
GROUP BY DPQL_ALIAS(DATE_FORMAT(tickets.date_created, '%Y-%M'), 'Date
('Created
ORDER BY tickets.date_created
```

Note we're using [DATE_FORMAT](#) to format the date the ticket was created so the count is per
* .month

:'We're also using [DPQL_ALIAS](#) to format the title of the group by column to 'Date Created

 Download as CSV

Date Created	Tickets Created
2018-October	14
2018-November	38
2018-December	47
2019-January	45

You can format the date using standard MYSQL specifiers. There's a useful list of options *
