Yes, it's possible to have the default behavior of a Ticket Template be that the Agent who .creates it is the Assigned Agent

To set this up, you want to go to **Admin > Ticket Structure > Ticket Templates**. Then select the Template you want this to apply to, or create a new one. Where you set this is under **Assignment**, you will need the toggle next to **Agent** enabled, and then have the :option set to **Current**, like this

Once you've done this and made the Ticket Template available for your team, whichever .Agent creates the Ticket will automatically be the Assigned Agent
