

Custom date field not working with format function

Ben Henley - 2023-08-01 - Comment (1) - Creating Reports

:Question

:I'm trying to create a report that includes information from a custom date field

```
'SELECT DATE_FORMAT(tickets.custom_data[1]), '%Y-%m-%d') AS 'Date
```

?However, the result table only displays *None* for that column. How can I fix this

:Answer

Custom date fields contain integer timestamp values, so before you use the DATE_FORMAT function, you first have to convert to real dates using FROM_UNIXTIME

```
DATE_FORMAT(FROM_UNIXTIME(tickets.custom_data[1]), '%Y-%m-%d') AS  
' 'Date
```
