

## How can I make knowledgebase articles visible to specific ?users only

Simon Paulger - 2023-09-13 - Comment (1) - Agent

You can restrict Knowledgebase Articles so that only certain users can see them. The easiest way to achieve this is with **usergroups** and Knowledgebase **categories** and then .setting up a category so that it's visible only to particular usergroups

.In the agent interface, go to **Help Center > Knowledgebase** and click on a KB category

.On the right-hand side, click on the edit button for the category

In the dialog that loads, you can select which usergroups can see this category in .the **Usergroups** heading

Note

.You can have a category that's visible to everyone which contains a restricted subcategory

.To change the usergroups in your helpdesk, go to **Admin > CRM > Usergroups**

.To add users to usergroups, use the **CRM** section of the **Agent** interface
