

## How can I show text on the Help Center only to a certain usergroup

Hannah Scott - 2023-09-13 - Comment (1) - Help Center

### **:Question**

How do I edit a portal template to show some text only to users who belong to a particular usergroup

### **:Answer**

First, find the ID number of the Usergroup you wish to show the text to in **Admin > CRM > Usergroups**

Now add this to the Help Center template where you want the message to appear

```
{% (if app.user.isMemberOfUsergroup(N %)
```

```
Text to display
```

```
{% endif %}
```

replacing N with the ID of the usergroup, and putting the message you want in place of  
."Text to display

.See the admin guide for [Editing Help Center Templates](#)
