

How do I change the fields on the ticket form

Ben Henley - 2023-09-19 - Comment (1) - Deskpro Legacy

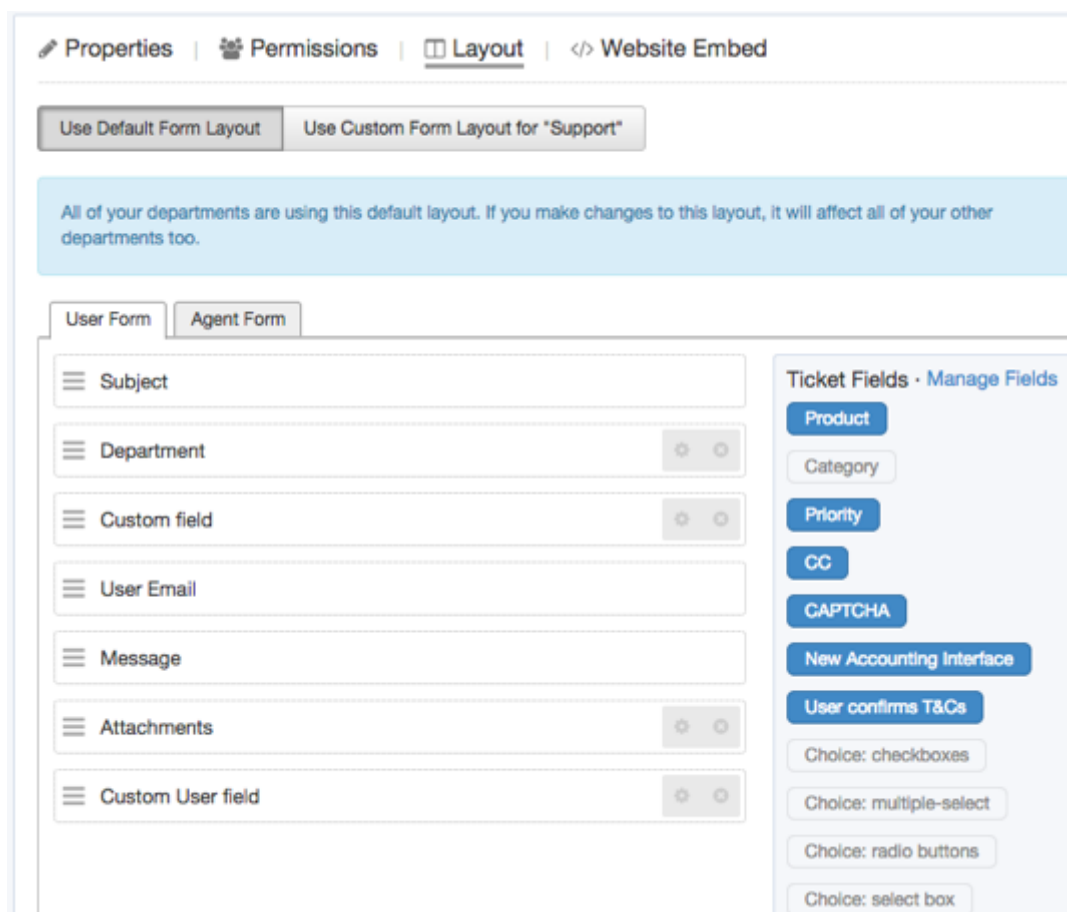

:Question

How can I change the fields displayed when a user submits a ticket from the portal

:Answer

You can add and configure ticket fields from **Admin > Tickets > Fields**

Then you edit the form under **Tickets > Departments** using the **Layout** tab. This function is in the **Departments** section because each department can have its own form layout; you can request different information for a support ticket and a sales ticket, for example

The screenshot shows the 'Layout' tab in the Deskpro Admin interface. At the top, there are tabs for 'Properties', 'Permissions', 'Layout' (selected), and 'Website Embed'. Below these, there are two buttons: 'Use Default Form Layout' and 'Use Custom Form Layout for "Support"'. A blue informational box states: 'All of your departments are using this default layout. If you make changes to this layout, it will affect all of your other departments too.' Below this, there are two tabs: 'User Form' (selected) and 'Agent Form'. The 'User Form' section displays a list of fields: 'Subject', 'Department', 'Custom field', 'User Email', 'Message', 'Attachments', and 'Custom User field'. Each field has a menu icon on the left and a settings icon on the right. To the right of the 'User Form' section is a 'Ticket Fields - Manage Fields' sidebar. This sidebar contains a list of fields: 'Product', 'Category', 'Priority', 'CC', 'CAPTCHA', 'New Accounting Interface', 'User confirms T&Cs', 'Choice: checkboxes', 'Choice: multiple-select', 'Choice: radio buttons', and 'Choice: select box'.

You can also add user fields to the ticket form. Add and configure them in **CRM > Fields > Users**

Note that you use this screen to customize the form that agents use to create a ticket
.within the agent interface - you can request different information from users and agents
.For more details, see [Ticket form layouts](#) in the admin manual
